## // 1.0 INSTALLATION REQUIREMENTS

These appliances are supplied with a pre-wired three pin plug and 1.8 metres of electrical cable. It is therefore necessary for a suitable electrical socket to be located within this distance and be easily accessible. The appliances are suitable for installation in static holiday/park homes. The appliances may be hard wired into a fuse spur, providing that the fuse spur is external to the installation and easily accessible, this must be carried out by a service agent or competent person, such as a qualified electrician. This heater is for use on 220–240 volts. The cord is a 3-pin plug as shown below and is 1.8m.

### // ATTENTION:

These instructions should be read carefully and retained for future reference.

## // 2.0 IMPORTANT NOTES

When using this electrical appliance, basic precautions should be followed to reduce the risk of fire, electric shock and injury to person, including the following:

This heater must be used on an AC supply only and the voltage marked on the heater's rating label must correspond to the supply voltage.

DO NOT switch the appliance on until it is properly installed as described in this manual.

This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

Children of less than 3 years should be kept away unless continuously supervised. Children aged from 3 years and less than 8 years shall only switch on/off the appliance provided that it has been placed or installed in its intended normal operating position and they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.

Children aged from 3 years and less than 8 years shall not plug in, regulate and clean the appliance or perform user maintenance.

**CAUTION:** Some parts of this appliance can become very hot and cause burns.

Particular attention has to be given where children and vulnerable people are present.

Check that all parts included are intact and not damaged. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard. Never use the appliance if the cord or any part of the appliance shows signs of damage. The heater must not be located immediately below a socket-outlet.

DO NOT use this heater in the immediate surroundings of a bath, a shower or a swimming pool.

**WARNING:** In order to avoid overheating,  DO NOT cover the fan of the heater.

DO NOT use this heater with a programmer, timer, separate remote-control system or any other device that switches the heater on automatically, since a fire risk exists if the heater is covered or positioned incorrectly.

**CAUTION:** In order to avoid a hazard due to inadvertent resetting of the thermal cut-out, this appliance must not be supplied through an external switching device, such as a timer, or connected to a circuit that is regularly switched on and off by the utility.

**WARNING:** This heater is not equipped with a device to control the room temperature. Do not use this heater in small rooms when they are occupied by persons not capable

of leaving the room on their own, unless constant supervision is provided.

Keep furniture, curtains and other fabric material away from appliance.

DO NOT leave the appliance unattended during use.

DO NOT run the mains cable under carpets, rugs etc.

 DO NOT cover or obstruct the heater in any way. Overheating will result if it is accidentally covered.

Never immerse the appliance in water or any other liquids.

DO NOT use the appliance outdoors.

Before cleaning the appliance, ensure it is unplugged from the power and that it is completely cool.

DO NOT clean the appliance with abrasive chemicals.

Never use accessories that are not recommended or supplied by the manufacturer. It could cause danger to the user or damage to the appliance.

DO NOT insert or allow foreign objects to enter the inlet or outlet vents as this may result in electric shock, fire or damage to the appliance.

DO NOT install the fire using an extension cord.

Unplug from the mains supply if the appliance is not to be used for long periods.

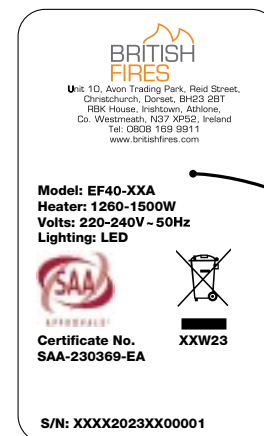

This appliance is only suitable for well-insulated spaces or occasional use.

DO NOT use this appliance in an open flue.

## // 3.0 APPLIANCE DATA FOR THE NEW FOREST 650sq

### New Forest 650sq Electric Fireplace

Weight	35 kg
Dimensions	911 x 652 x 222mm
Supply Voltage & Rating Power	220-240V ~, 50Hz
Heating Elements	1260-1500W
Lighting	LED
Approvals	SAA

Item	Symbol	Value	Unit
<b>Heat Output</b>			
Nominal heat output	P <sub>nom</sub>	1.5	KW
Minimum heat output (indicative)	P <sub>min</sub>	0.75	KW
Maximum continuous heat output	P <sub>max, c</sub>	1.5	KW

### Auxiliary electricity consumption

At nominal heat output	e <sub>lmax</sub>	0.0	KW
At minimum heat output	e <sub>lmin</sub>	0.0	KW
In standby mode	e <sub>lSB</sub>	0.0	KW

Item	Unit
<b>Types of heat input, for electric storage local space heaters only</b>	
Manual heat charge control with integrated thermostat	N/A
Manual heat charge control with room and/or outdoor temperature feedback	N/A
Electronic heat charge control with room and/or outdoor temperature feedback	N/A
Fan assisted heat output	N/A

### Type of heat output/room temperature control

Single stage heat output and no room temperature control	No
Two or more manual stages no temperature control	No
With mechanical thermostat room temperature control	Yes
With electronic room temperature control	No
Electronic room temperature control plus day timer	Yes
Electronic room temperature control plus week timer	Yes

Item	Unit
<b>Other control options</b>	
Room temperature control with presence detection	No
Room temperature control with open window detection	Yes
With distance control option	No
With adaptive start control	No
With working time limitation	No
With black bulb sensor	No

This fire is fitted with LED's (Light Emitting Diode) in place of conventional bulbs. LED's generate the same light levels as conventional bulbs, but use a fraction of the energy consumed.

# // 4.0 COMPONENT CHECKLIST

Quantity	Description
1	Heater unit
2	Wall fixing brackets
2	Side Slip brackets
2	Flush Wall brackets
1	Remote control handset
1	Box of logs
1	Bag of dark slate
1	Bag of light slate
1	Bag of bark
1	Bag husk
1	Bag of large crystals
1	Bag of small crystals
2	AAA batteries
12	Firebox screws
4	Wall plugs
4	Fixing screws
4	Cavity box brackets
1	Cavity box (Optional)
1	Deluxe Real Log set (Upgrade opt.)

When unpacking the product please note the loose components are in the top polystyrene compartments

# // 5.0 SITE REQUIREMENTS

It should be noted that the appliance creates warm convected air currents. These currents move heat from the room surroundings to, and up the wall surfaces adjacent to the heater.

If the appliance is to be secure on a dry wall or a timber framed construction then the integrity and ability of the wall to secure the appliance must be confirmed. It is important in these circumstances that any vapour barrier and/or structural members of the house frame are not damaged.

If you are unsure of the ability of the wall to secure the appliance and/or which type of wall fixing to use, you should take professional advice and obtain the correct fixings. Alternatively, find a more suitable wall location.

- DO NOT run the supply cable under carpets.
- DO NOT site in a position where curtains or drapes could cover the appliance, or other soft materials could cover e.g. below a coat rack.
- DO NOT site behind an opening door where mechanical impact/damage could occur.
- DO NOT site where the supply cable would become a trip hazard.
- DO NOT sit, stand or forcefully pull on the appliance.
- DO NOT obstruct, cover or force items into the openings.
- DO NOT use the heater to dry clothes.
- DO NOT site/use in an outdoor location[s].

It is important that the following clearances are maintained from the appliance to combustible materials. These clearances are dependent on the securing location as defined on the following pages.

## // 6.0 CLEARANCES TO COMBUSTIBLES

The minimum distance to the front of the appliance is 900mm.

There are no clearances for above or side of the appliance, apart from being clear of curtains and drapes for a flush wall installation.

## // 7.0 UNPACKING THE APPLIANCE

BEFORE STARTING THE INSTALLATION OF THIS FIREPLACE, PLEASE READ THE FOLLOWING:

- 1) The installation should be carried out by two adults to avoid injury or damage. If for any reason it is considered too heavy, please obtain assistance.
- 2) When lifting the electric appliance, always keep your back straight. Bend your legs and not your back. Avoid twisting at the waist. It is better to reposition your feet.
- 3) Avoid upper body / top heavy bending. Always bend from the knees rather than the waist. Do not lean forward or sideways while handling the appliance.
- 4) Always grip the appliance with the palm of the hand – do not use the tips of fingers for support.
- 5) Always keep the appliance as close to the body as possible. This will minimize the cantilever action.
- 6) Use gloves to provide additional grip.
- 7) Unpack the package and lift the appliance gently out of the box. Put it on a flat surface with the front panel facing forward.

### // CAUTION:

This appliance is heavy. Always seek assistance whilst unpacking and/or during installation. Please read all the instructions before continuing to unpack or install appliance.

### // IMPORTANT:

Please read completely through the instructions and verify that all listed parts are present before assembly.

## // 8.0 PREPARING THE APPLIANCE

FOR INSTALLING INTO AN EXISTING OPENING (FLUSH TO THE WALL)

Using a cross headed screw driver screw the 2x flush wall fixing brackets onto the sides of the appliance with the 4x firebox screws provided. When the 2x brackets are installed they will finish flush with the front face of the firebox.

Place the appliance in its final installation position. Once in position, place a level on top of the appliance to ensure it is level. If the appliance is not level, there are adjustment feet at the bottom of the appliance to alter the height, Screw/unscrew the adjustment feet by hand to the desired height.

## // 8.1 PREPARING THE APPLIANCE – STUD WALL

Rear Fixing Installation

Side Fixing Installation

Using a cross headed screw driver screw the 2x wall brackets onto the top of the appliance with the 4x firebox screws provided to suit your installation best, i.e. rear fixing or side fixing.

Place the appliance in its final installation position. Once in position, place a level on top of the appliance to ensure it is level. If the appliance is not level, there are adjustment feet at the bottom of the appliance to alter the height, Screw/unscrew the adjustment feet by hand to the desired height.

## // 8.1 PREPARING THE APPLIANCE – CAVITY BOX OPTIONAL TO USE WITH A SURROUND

Line the holes in the slip brackets and the cavity fixing brackets up with the corresponding holes in the side of the firebox, once in position use a cross headed screw driver to screw the 8x firebox screws into place, securing both brackets to the appliance.

Place the appliance in its final installation position. Once in position, place a level on top of the appliance to ensure it is level. If the appliance is not level, there are adjustment feet at the bottom of the appliance to alter the height, Screw/unscrew the adjustment feet by hand to the desired height.

## // 9.0 INSTALLATION OVERVIEW

British Fires assumes absolutely no responsibility for injuries and damages that may occur due to improper installation or handling.

Remove any protective film coatings from the finished/decorative surfaces of the appliance, if any. After having selected the final position of the appliance taking into account the integrity of the wall the electric appliance may be secured to the wall.

To ensure customer safety, be sure to design the installation so that the strength of both the wall and any wall fixings used are sufficient. Do not block the ventilation holes of the appliance. The wall onto which the appliance/stud wall is installed must be flat. Install only on a vertical surface. Avoid sloped surfaces. Installation onto anything other than a vertical wall may result in fire, damage or injury.

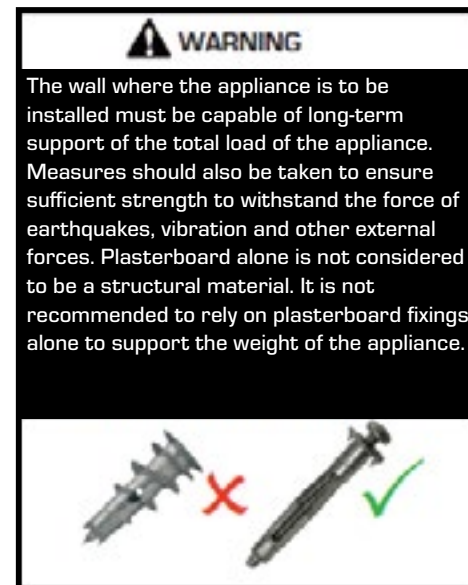

If the appliance/stud wall is to be mounted on a dry wall or a timber framed construction wall then efforts should be made to fix into two or more wooden studs, or supporting wooden members of the wall using the fixing screws provided. If this is not achievable then the wall should be strengthened using appropriate building materials.

Ensure that the correct wall plugs are used for the type of wall that the stud work is being connected to.

Ensure the plug is fully accessible.

### // WARNING:

Before enclosing the appliance, test the power in situation in order to ensure the power to the appliance working properly.

Check regularly for security of wall fixings as appropriate. Also check security of supply cable and connections. If the supply cable becomes damaged, it must be replaced by a service agent or competent person, such as a qualified electrician.

**Please note:** Before drilling into wall, always check that there are no hidden wires, pipes, etc. Make sure that the screws and wall plugs supplied are suitable for supporting the unit to the surface. Consult a qualified person if you are not sure.

## // 9.1 INSTALLATION – EXISTING OPENING

IF INSTALLED INTO AN EXISTING CHIMNEY BREAST, THE FLUE MUST BE BLOCKED OFF

Open Dimensions for New Forest 650sq		
Height	Width	Depth
920mm	670mm	224mm minimum

To install the appliance into an existing chimney breast create an opening to the dimensions stated above.

Once the appliance is in the correct position install the plaster board onto the wall. **Ensure that the firebox is not drilled into when installing the plaster board.** Then refer to section 9.5 & 10.0 on pages 18 & 19 on how to remove the front glass and install the fuel bed layout.

- 1) Insert the appliance in to place then with a pencil, mark out on the wall the 2x hole positions.
- 2) Remove the appliance from its position. Then with an 8mm drill bit, if using the wall fixing supplied drill 2x holes 50mm deep.
- 3) Insert the wall plugs into the wall. Then plug the appliance into the wall and check the power to the appliance. Refer to sections 11.0 & 12.0, page 23, on how to sync the remote and operate the appliance.
- 4) Once the power to the appliance has been confirmed, insert the appliance back into the opening, lining the holes in the brackets with the holes in the wall.
- 5) Screw the wall screws through the wall brackets on the appliance and into the wall plugs into the wall and tighten, securing the appliance into place.

## // 9.2 INSTALLATION – STUD WALL

This appliance should be positioned on a firm level surface and in a clean 'dust free' environment.

Once the frame work has been constructed and secured to the wall and the appliance is in its end position, ensure that there is power to the appliance before any cladding/plasterboard is installed.

For a stud wall installation, create a structure with an opening to the dimensions stated to the right. Ensure the structure is safely secured to the wall using the appropriate fixings method, please see relevant section 9.0 for further information.

**Please note:** Before drilling into wall, always check that there are no hidden wires, pipes, etc. Make sure that the screws and wall plugs supplied are suitable for supporting the unit to the surface. Consult a qualified person if you are not sure.

Open Dimensions for NF650sq Studwall Installation

Height	Width	Depth
932mm	670mm	224mm minimum

### // WARNING:

Do not keep the appliance connected to the electrical supply at this time.

## // 9.2 INSTALLATION – STUD WALL

### SIDE & REAR WALL FIXING

- 1) Insert the appliance into the false chimney breast. With a pencil mark through the wall fixing bracket on to the wall/studding where you wish to attach the appliance to the structure.
- 2) Remove the appliance from the position and use an appropriate drill size for the chosen wall fixing. If the appliance is to be installed into a brick masonry wall the supplied wall plugs can be used, to use these wall plugs drill a 8mm by 50mm hole into the wall.

- 3) Insert the 2x wall plugs into position, then return the appliance to its finished position.
- 4) Screw the wall screws through the wall brackets on the appliance and into the wall plugs in the wall and tighten, securing the appliance into position.
- 5) Once the appliance is in the correct position plug the appliance into the wall and check the power to the appliance. Refer to sections 11.0 & 12.0, page 23 on how to sync the remote and operate the appliance.

## // 9.2 INSTALLATION – STUD WALL

### STUD WALL INSTALLATION CONTINUED

Once the power to the appliance has been confirmed, insert the cladding onto the stud work. Ensure that the firebox is not drilled into when installing the cladding to the structure. Then refer to section 9.5 & 10.0, pages 18–19, on how to remove the front glass and install the fuel bed layout.

DO NOT DRILL THROUGH HIGHLIGHTED SECTION BELOW

#### // IMPORTANT:

Important do not drill through the appliance when installing the cladding into position! The power cable is located on the rear right hand side of the appliance!

DO NOT DRILL DIRECTLY UNDERNEATH APPLIANCE

## // 9.3 INSTALLATION – EXISTING OPENING WITH A SURROUND

If installing the appliance into an existing chimney breast, the flue **MUST** be blocked off

Open Dimensions for New Forest 650sq		
Height	Width	Depth
920mm	670mm	224mm minimum

To install the appliance into an existing chimney breast create an opening to the dimensions stated above.

## // 9.3 INSTALLATION – EXISTING OPENING WITH A SURROUND

- 1) Insert the appliance in to place then with a pencil, mark out on the wall the four hole positions.
- 2) Remove the appliance from its position. Then, if using the wall fixings supplied, drill eight 8mm x 50mm deep holes.
- 3) Insert the wall plugs into the wall.
- 4) Plug the appliance into the wall and check the power to the appliance. Refer to sections 11.0 & 12.0, page 23, on how to sync the remote and operate the appliance.

**NOTE:** The depth from the wall to the front face of the appliance is 54mm.

- 5) Insert the 20mm back panel into position in front of the appliance and secure safely to the wall. Then place the chosen surround in front.

**THE SURROUND MUST BE SECURED CORRECTLY TO THE WALL!**

- 6) Now, refer to section 9.5 and 10.0, pages 18 & 19, on how to remove the front glass and install the fuel bed layout.

**Please note:** Before drilling into wall, always check that there are no hidden wires, pipes, etc. Make sure that the screws and wall plugs supplied are suitable for supporting the unit to the surface. Consult a qualified person if you are not sure.

## // 9.4 INSTALLATION – CAVITY WALL WITH A CAVITY BOX

### OPTIONAL EXTRA PURCHASE

- 1) For a cavity wall installation with a cavity box create an opening in the wall to the dimensions stated above.
- 2) With an 8mm drill bit, if using the wall fixings supplied, drill 4x 8 x 50mm deep holes
- 3) Insert the cavity box into place then, with a pencil, mark the 4x screw holes.
- 4) Remove the cavity box then drill 4x 8 x 50mm where the marks are made.
- 5) Insert the wall plugs into the holes then insert the cavity box back into position. The drilled holes and holes from the cavity box should be aligned.

Open Dimensions for Cavity Wall Installation

Height	Width	Depth
998mm	725mm	198mm minimum

**Please note:** Before drilling into wall, always check that there are no hidden wires, pipes, etc. Make sure that the screws and wall plugs supplied are suitable for supporting the unit to the surface. Consult a qualified person if you are not sure.

## // 9.4 INSTALLATION – CAVITY WALL WITH A CAVITY BOX

OPTIONAL EXTRA PURCHASE

**25mm Thick Rockwool Insulation** not included

Cut 25mm thick rockwool (not included) to the dimensions stated above, then line the cavity box with the 25mm insulation.

- 6) Next, connect the appliance to a power source then carefully move the cavity box and the 25mm insulation then the appliance back into the opening without trapping the power cable

## // 9.4 INSTALLATION – CAVITY WALL WITH A CAVITY BOX

OPTIONAL EXTRA PURCHASE

- 7) Once the appliance is in the correct position check the power to the appliance. Refer to sections 11.0 & 12.0, page 23, on how to sync the remote and operate the appliance
- 8) After the power to the appliance has been confirmed, insert the 4x wall screws through the cavity box into the wall and tighten to secure the appliance into position. Then refer to section 9.5 & 10.0, pages 18 & 19, to remove the front glass and install the fuel bed.

20mm Slips Not Included  
Surround Not Included

**NOTE:** Insert the 20mm slips (not included) into position in front of the appliance and secure safely to the wall. Then place the chosen surround (not included) in front.

The Surround must be secured correctly to the wall

## // 9.5 REMOVING THE FRONT GLASS

**WE STRONGLY RECOMMEND PROTECTIVE GLOVES ARE USED WHEN HANDLING THE GLASS**

- 1) To remove the front glass from the appliance use a cross headed screw driver to remove the screws from either end of the glass retaining bracket.

**Ensure the glass is supported at all times!**

- 2) Next, gently pull the top of the glass towards you while ensuring you have full support of the glass.

- 3) Lift the glass up and out from the appliance and place the glass on a soft, flat, surface.

- 4) Insert your preferred fuel bed layout as shown in the following pages in section 10.0 on page 19.

**NOTE** To re-install the glass use these instructions in reverse order.

**Ensure the glass is supported at all times!**

## // 10.0 FOREST VIEW FUEL BED LAYOUT

Taking a small amount of the small crystals, scatter these over the frosted bed as shown above.

Use the slate pieces and place these randomly on the bed as shown in image 4, above.

Use the contents from the Forest terrain bag and place this in the formation shown above (image 2) towards the front and sides of the frosted bed. There should be a single layer to cover this area of the frosted base and the crystals still visible.

Using the contents from the Husk bag cover the area on the frosted bed that is still exposed while making sure the crystals are still visible.

Place the logs on top of the base layer created by the Crystals, Forest terrain, Husk and Slate pieces. Position them as shown above. The logs can be placed in any order; for this look the larger logs are in the center with the remaining logs around them.

**IMPORTANT** - Place the logs carefully on the fuel bed so you do not make contact with the rear and side glass. Contact with glass may cause damage.

## // 10.1 SLATE VIEW FUEL BED LAYOUT

1

Evenly scatter the small crystal over the frosted bed as shown in image 1, left. The crystals should be spread across the entire base, forming a layer. Large crystals are optional.

2

Take the two types of Slate-effect pieces and spread them evenly on the bed of crystals.

3

Place the logs on top of the base layer created by the Crystals and Slate pieces. Position them as shown in image 3. The logs can be placed in any order, for this look the larger logs are in the center with the remaining logs around them.

**IMPORTANT** – Place the logs carefully on the fuel bed so you do not make contact with the rear and side glass. Contact with glass may cause damage.

## // 10.2 DIAMOND LIGHT VIEW FUEL BED LAYOUT

Evenly scatter the small crystal over the frosted bed as shown in image 1, left. The crystals should be spread across the entire base, forming a layer.

Take the larger crystals and place these in position as shown in image 2. For the best results, remove a small amount of the small crystals and place the large crystals directly on the frosted bed.

## // 10.3 DELUXE REAL LOGS (UPGRADE OPTION)

**WE STRONGLY RECOMMEND PROTECTIVE GLOVES ARE USED WHEN HANDLING THE GLASS**

1) To remove the front glass from the appliance, use a cross headed screwdriver to remove the screws from either end of the glass retaining bracket of the appliance, holding the glass in place. Ensure the glass is supported at all times.

2) Next, gently pull the top of the glass towards you, ensuring you have full support of the glass.

3) Lift the glass up and out from the appliance and place the glass on a soft, flat surface on the floor.

4) Remove the eight (6x) screws that hold Crosshead screws the fuel bed into position, then carefully remove the fuel bed tray from the appliance and place safely to one side. A flat head screw driver can carefully be used to lever the fuel bed out if extra help is required.

5) Carefully place the deluxe fuel bed tray into position and line the holes in the fuel bed up with the holes in the firebox. Insert the 2x 1x1/2 8 screws that secure the fuel bed back into position.

6) Carefully lift the front glass into the front slot at the bottom of the appliance, then carefully offer the top of the glass back into position.

7) Use a cross headed screwdriver to screw the screws from either end of the glass retaining bracket of the appliance, holding the glass in place.

## // 11.0 PAIRING THE REMOTE CONTROL

The ON/OFF switch is located on the front, top right hand side of the appliance. Press the O/I button once to turn the fire on. The appliance will then automatically start with the LED flame-effect activated.

Within 1 minute of turning the power on by the main ON/OFF switch (located on the front, top right hand side of the appliance), press and hold and the  and  buttons on the remote control for 3 seconds, to remotely pair to the appliance, the LCD only displays bL (displayed at the display temperature position) and flashes for 5 seconds, then returns to the current display state. The remote is then paired to the appliance.

## // 12.0 OPERATING THE APPLIANCE

The ON/OFF switch is located on the front, top right hand side of the appliance.  
Your model may require pressing the O/I button once to turn the fire on.

### REMOTE CONTROL

The button distribution of the remote controller is as shown right, and the current state information of the electric fireplace, such as the flame effect, fuel bed, setting, temperature and time set, is displayed on the LCD screen on the remote control.

#### 1) Standby

Turns the appliance ON/OFF standby, the default settings are: heater set to 82°F/27°C, the main flame effect is F1, the Fuel bed is L1 (no temperature display).

#### 2) Flame Control

Changes the flame effect brightness F1, F2, F3, F4, F1 (cycle adjustment)

#### 3) Heater

Heater button switches to the temperature adjustment option when the weekly timing function is adjusted. Then use the  and  buttons to select the desired temperature. The temperature cannot be adjusted while the daily timer control is in use. Only the heating function can be switched.

Temperature Setting range:

Centigrade: 17°C, 18°C, 19°C, 20°C, 21°C, 22°C, 23°C, 24°C, 25°C, 26°C, 27°C, ON, 17°C (Cycle)

Fahrenheit: 62°F, 63°F, 64°F, 65°F, 66°F, 67°F, 68°F, 69°F, 70°F, 71°F, 72°F, 73°F, 74°F, 75°F, 76°F, 77°F, 78°F, 79°F, 80°F, 81°F, 82°F, ON, 62°F (Cycle)

\* Press and hold the heater button for 3 seconds can transfer from °C to °F.

#### 4) Fuel Bed

Changes the colour of the fuel bed. L1, L2, L3, L4, L1 (cycle adjustment)

#### 5) Sleep Timer

Adjusts the timer: 1H, 2H, 3H, 4H, 5H, 6H, 7H, 8H, 9H, OF, 1H (cycle)

#### 6) Down Light

Turns the down lighting ON/OFF, (the down light symbol will be lit when it is turned on).

#### 7) Time and Week Settings

Press to enter the time and week timer settings.

#### 8) Lower temperature 1°C or F°

Press this button to lower the temperature by -1°, incrementally, while the heating is turned on.

#### 9) Raise Temperature 1°C or F°

Press this button to raise the temperature by +1°, incrementally, while the heating is turned on.

#### 10) Date Set

To choose from Monday to Sunday or week timer mode option. Option mode: 1-2-3-4-5-6-7-A-oF.

## // 12.0 OPERATING THE APPLIANCE

### Standby Button:

Turns the appliance ON/OFF standby, the default settings are: heater set to 82°F/27°C, the main flame effect is F1, the Fuel bed is L1 (no temperature display).

### Changing Flame Effect:

In the power-on state, press this button, the digital screen displays the flame position and the flame indicator is bright, and the main flame position can be adjusted. The flame brightness settings are: F1, F2, F3, F4, **Set as follows:**

Button	Display	Flame Effect
1st Press	F1	Full
2nd Press	F2	Medium
3rd Press	F3	Low
4th Press	F4	cycle through settings

### Heating Operations:

**1)** Press the heater button to turn the heating function on and off and adjust the temperature setting. Heater is divided into temperature settings: 62°, 63°, 64°, 65°, 66°, 67°, 68°, 69°, 70°, 71°, 72°, 73°, 74°, 75°, 76°, 77°, 78°, 79°, 80°, 81°, 82°, ON, 62°F. [Circular operation control

**2)** Press and hold the heater button for 3 seconds to convert the temperature unit from °C to °F. The temperature display window will flash. After the temperature is set, the display unit will flash 5 times, then automatically save the settings and exit the setting state. After the display unit is turned on, if there is no operation within 10 seconds, the setting status is also exited.

**3) Fan delay function:** After the appliance is turned off, the fan will continue running for 15 seconds then stop.

**Open Window Detection function:** When the appliance is heating and the ambient temperature suddenly drops  $\geq -5^{\circ}\text{C}$  ( $9^{\circ}\text{F}$ ) within 10 minutes, and the environment cannot be warmed up within 30 minutes the appliance will automatically display “OP”. The heating function will then be automatically turned off, and when the “OP” is displayed, it can be turned off and then restarted by turning off and on the appliance to clear the fault code.

**4)** This appliance has a non-self-resetting overheat protection device (thermal cut-out) which will activate if the air inlets or outlets are obstructed. For safety reasons the fire will NOT switch on again automatically, the following procedure must be carried out before the fire can be operated.

**NOTE:** The flame-effect will remain operational if the cut-out is activated, only the fan heater is prevented from working.

Switch OFF the appliance at the wall socket or outlet. Leave the fire OFF for a period of no less than 10 minutes, ensuring all obstructions are removed. Switch the appliance ON at the wall. Ensure the appliance is turned ON at the control switches. If the fire fails to operate correctly, repeat the above procedure.

Refer to section 13.0 for more information about the Safety Cut-Out System.

### Fuel Bed Options:

Once powered, press the “Fuel Bed” button and the LCD screen on the remote will display the fuel bed icon. Now, the fuel bed colour can be adjusted. The different settings are: L1, L2, L3, L4; Fuel bed light. **Set as follows:**

Button	Display	Flame Effect
1st Press	L1	Orange
2nd Press	L2	Blue
3rd Press	L3	Orange + Blue
4th Press	L4	Cycle through settings

### Setting Sleep Timer:

In the timed display, press the “Sleep Timer” button to adjust the time, plus one hour for each press. (You can’t enter the weekly timing selection, you can only set the current automatic shutdown time. This function is available when the weekly timing function is turned on. Will not operate). Timing range: 1H, 2H, 3H, 4H, 5H, 6H, 7H, 8H, 9H, OF, 1H (cycle adjustment).

### Control Down Lighting:

Turns the down lighting lights on and off.

### Setting Clock and Timer:

Use the date button to choose from Monday to Sunday or week timer mode option. Option mode: 1-2-3-4-5-6-7-A-oF.

#### Clock setting:

**1)** At standby state (after the unit is plugged in and before pressing “main power”), press and hold the Setting button on the remote for 3 seconds, the digital display will then flash “00:00”.

**2)** Press  on the remote control to set the hour, press the remote control  to set the minutes.

**3)** Press “Setting” to enter the setting of the week timer. Press  to select Sunday to Saturday, The date symbol will light up after the day is selected. When finished, press the  button to exit setting.

**Note:** The current clock must be set after the initial power-on or power-off, otherwise the clock will remain “00:00” status and you won’t be able to set the week timer function.

## // 12.0 OPERATING THE APPLIANCE

### Heat settings:

Use remote control's Heater button  to select the temperature. The system default parameters are: 82°F/27°C. Press  &  buttons to select the temperature when the heating is turned on. Temperature range: 62°, 63°, 64°, 65°, 66°, 67°, 68°, 69°, 70°, 71°, 72°, 73°, 74°, 75°, 76°, 77°, 78°, 79°, 80°, 81°, 82°, ON, 62°F. [Cycle]

### Timing switch ON/OFF preset:

1) While in the standby state, press the sleep timer  button on the remote for three seconds to pre set timing switch on/off the week timer. Enter mode 1, while the display is "1 ON", the clock will be "01:00", press  to set hour, press  to set minute, press  to set the week, every press on the  will show SU, MO, TU, WE, TH, FR, SA and flash in turn, you can use the  key to select or de-select the desired date. The  indicates all of the selected days. Press the "Heater"  button to enter the temperature setting, then press

the  &  button to set temperature.

2) Press "Setting"  again to set the timer switch off, the display is 1 OFF, the clock is displayed as "02:00", press  to set hour, press  to set minute, the date of the timer off is the same as the timer on, you can't change this manually. After

setting, press  to enter the setting of mode 2, which operates the same as mode 1. You can set mode 1 to mode 7 with the above method. Press  or  on the remote for 3 seconds to save setting and exit week timer setting.

3) After the preset timing ON/OFF switch, you can use clock/timer  button to select the desired timing mode 1-2-3-4-5-6-7- auto option, after the option shows five seconds without any operation, it will save the selected option and enter the current setting of the option, the timer logo of the display lighten

and will automatically run the preset switch setting program. You can individually select each setting of modes 1-7 for automatic ON/OFF switching, or you can preset the desired settings, and then select "auto mode" for multiple preset series executions.

4) If you want to set the ON/OFF switch and temperature setting for different periods of the week, then set the switching time and temperature of each day from Sunday to Monday in mode 1-7. After setting, use "auto mode" to run timing switch and then system will run the week timer of 1-7 modes. You can also set 1-7 modes within 1 day, use "auto mode" to run timing switch ON/OFF within one day. Be aware that when you use "auto mode", you need to make sure the settings of times does not overlap each other, otherwise the timer will not operate.

5) After entering the week timer setting, press the  button for 3 seconds to exit week timer mode, then the timer symbol will be extinguished. You can check the 1-7 timer settings by pressing the "Setting"  button. Example: press  to display [1 ON "01:00" temperature 80°F], press  again to display [1 OFF "02:00" temperature 80°F]. Press the "Setting" button again to display [2 On "03:00" temperature 79°F] then press the Setting button to display [2 OFF "13:00" temperature 80°F]. The wireless remote control and the appliance must be kept within 4 meters to prevent the remote control and the appliance from failing due to the distance exceeding the effective remote control range when working at the weekly timing. After the weekly time is turned on, the remote controller automatically controls the appliance at the set appointment time.

## // 13.0 SAFETY CUT-OUT SYSTEM

This appliance has a non-self-resetting overheat protection device (thermal cut-out) which will activate if the air inlets or outlets are obstructed. For safety reasons the fire will NOT switch on again automatically.

The following procedure must be carried out before the fire can be operated again:

- 1) Switch OFF the appliance *at the wall socket* or outlet. Leave the fire OFF for a period of no less than 10 minutes, ensuring all obstructions are removed.
- 2) Switch the appliance to ON at the wall.
- 3) Ensure the appliance is turned ON at the ON/OFF switches.

**NOTE:** During the cut-out test the fire will automatically display '88'.

If the fire fails to operate correctly, repeat steps one and two. If an attempt to switch on the appliance is made before the safety cut-out has reset, the appliance may cut-out for a further period of time.

If the sequence has been followed correctly and the appliance still fails to function, check the wall outlet. If this is not the cause, call an electrician or maintenance engineer.

**NOTE:** The flame-effect will remain operational if the cut-out is activated and only the fan heater is prevented from working.

## // 14.0 CLEANING AND MAINTENANCE

### Cleaning:

For general cleaning use a soft clean duster – never use harsh abrasive or cleaners. The glass panels should be cleaned carefully with a soft cloth. Remove the front facing glass pane in order to clean the inside of the pane. Please refer to section 9.0 to do this.

Except for periodic cleaning of dust, there are no specific requirements for care, other than regular cleaning of the general appliance. A wipe with a dry cloth is normally sufficient. DO NOT use abrasive cleaners as they can damage the finish. Make sure the heater outlet and inlet grille (located on the top, front, centre of the appliance) is kept clear of dust, pet hair and other airborne household matter. These should be vacuum cleaned periodically using a brush attachment. The LED light strips are designed and tested to last 20,000 hours.

### Handset Battery Replacement

#### Battery Requirements:

Two (2) AAA 1.5V

- 1) Remove the battery cover and the used batteries from the back of the remote control.
- 2) Insert the two replacement batteries the correct way into the battery holder—making sure the batteries are firmly seated.
- 3) Then insert the battery cover back into position.
- 4) You will then need to pair the remote to the appliance. Please refer to section 11.0 Pairing The Remote Control.

If in doubt consult a qualified electrician. Refer to Section 3.0 Appliance Data. Use only genuine manufacturers spare parts available from your supplier.

## // CAUTION:

Always disconnect the appliance from the mains supply outlet socket before undertaking any cleaning or maintenance!

## // 15.0 TROUBLESHOOTING GUIDE

My New Forest Electric Fire...	Remedy
is not switching on	Ensure mains switch is on.
is not emitting any heat	<p>The fire is fitted with an energy saving thermostat. If the temperature in the room is higher than the temperature selected on the fire, then the thermostat will stop the heater from turning on. For example, if the room temperature is 22°C or above and the fire's heater is set at 22°C, then the heater will not be required until the room temperature drops below 22°C. If this is the case select a higher temperature setting than the room's temperature and the heater will begin to operate. The safety cut-out may have been operated. Switch the appliance off, leave for 10 minutes then switch back on.</p>
shuts off after a period of time	<p>Check that the temperature is not set onto the lower settings.          If the room is warm enough the thermostat will stop the fire switching the heat on.</p> <p>Check that the air inlet/outlet is blocked off.</p> <p>Check that the window detection sensor has not activated.</p>
Display panel shows	<p><b>88</b> There is a fault with the heater. Check that the temperature is not set onto the lower settings. If the room is warm enough the thermostat will stop the fire switching the heat on. Check that the air vent are not blocked off.</p> <p><b>EE</b> There is an electrical fault. A service engineer will need to check the thermostat for any loose connections.</p> <p><b>OP</b> The open Window Detection function is in operation, this operates when the appliance is heating and the ambient temperature suddenly drops <math>\geq 5^{\circ}\text{C}</math> within 10 minutes, and the environment cannot be warmed up within 30 minutes, resulting in the appliance automatically displaying "OP." The heating function will then be automatically turned off, and when the "OP" is displayed, it can be turned off and then restarted by turning off and on the appliance to clear the fault code.</p>

## // 17.0 SERVICING

**There are no internal user serviceable parts.**

As the colours of the wires in the mains lead of this appliance may not correspond with the colour markings identifying the terminals in your plug, proceed as follows.

The blue wire must be connected to the terminal marked with an N or coloured black. The brown wire must be connected to the terminal marked with an A or coloured red. The green/yellow wire must be connected to the earth terminal which is marked with an E or with the earth symbol.

**IMPORTANT:** The wires in the mains lead are coloured in accordance with the following code:

Blue/Black	Neutral
Brown/Red	Active
Green/Yellow	Earth

### // WARNING:

**Never connect Active or Neutral wires to the Earth terminal of the plug.**

**NOTE:** If a moulded plug is fitted and has to be removed take great care in disposing of the plug and severed cable, it must be destroyed to prevent engaging into a socket. Refer to Section 3.0, Appliance Data for appliance specification. Use only genuine manufacturers spare parts available from your supplier.

## // 18.0 GUARANTEE, TERMS & CONDITIONS

### Automatic 3-year Guarantee

At British Fires we pride ourselves on quality and performance, so much so that each of our appliances is eligible for a three-year guarantee when purchased from an authorised dealer. Full warranty terms and conditions are available to view at [www.britishfires.com.au](http://www.britishfires.com.au).

### Terms & Conditions

All appliances must be installed in a correctly ventilated space in accordance with the manufacturer's installation instructions and the rules in force. All of our fires carry SAA approval. June 2023 British Fires Ltd.

- 1) For any claim to be made within three years from date of purchase you will be required to provide and supply your original proof of purchase.
- 2) All appliances must have been installed and operated in accordance with the manufacturer's instructions.
- 3) Purchase(s) must be made through an authorised stockist/retailer.

Please note all consumable items such as any ceramics including; coals, pebbles, logs, bark, crystals, rear panels are not covered by the 3-year guarantee.

During the guarantee period any appliance or component which is proved to be faulty or defective in manufacture, will be repaired or replaced free of material and labour charges, providing that we have authorised or carried out the repair or replacement. We will not accept or reimburse the costs of any third-party who undertakes any work carried on the appliance or fits parts, unless we have approved such work in advance of it being carried out. The guarantee period will not be extended even if we repair or replace any appliance or part.

### Making a claim:

If you wish to make a claim under our guarantee and all the terms and conditions for your appliance have been met then your initial contact must be made to the dealer/company from where you purchased the appliance. The relevant dealer will carry out initial troubleshooting and determine a reasonable course of action.

If you have any queries concerning the appliance, please send us an email.

**Email:** [sales@britishfires.com.au](mailto:sales@britishfires.com.au)

**Phone:** 1800 271 040

Waste electrical appliances should not be disposed of with household waste. Please recycle where facilities exist. Check with your local authority or retailer for recycling advice. As our policy is one of continuous improvement and development, we therefore, hope that you will understand we must retain the right to amend details and/or specifications without prior notice.
