

Carbon Reduction Plan

Supplier name: Securus Communications Ltd

Publication date: 29th September 2026

Foreward

Since it was founded, Securus Communications (Securus) has evolved into a trusted supplier of cloud, cyber and connectivity solutions to our customers across private and public sectors.

We recognise our responsibility to deliver solutions to customers that meet their requirements and exceed their expectations, but crucially ensuring that they are delivered sustainably.

We are helping our customers make reductions in their own carbon footprint through the delivery of cloud optimised solutions and resource efficient IT infrastructure.

Commitment to achieving Net Zero

Securus Communications Ltd (Securus) is committed to achieving Net Zero emissions across all scopes by 2047. We will also apply an interim target to achieve Net Zero in Scopes 1 and 2 for emissions by 2032.

We are in the process of achieving ISO 14001 Environmental Management certification, which demonstrates our commitment to environmental system improvement. Our Board reviews Securus's performance against our Carbon Reduction Plan on an annual basis.

This represents the first Carbon Reduction Plan for Securus, so the figures contained within are our baseline as calculated at the end of our most recent financial year.

Baseline Emissions Footprint

Our baseline is our financial year 2025-2026. The emissions here are a record of that produced by the business prior to the introduction of a strategy to reduce emissions.

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: July 2025 – Jun 2026	
Additional Details relating to the Baseline Emissions calculations.	
<i>The figures are sourced from primary (Scope 1 & 2) and secondary sources (Scope 3).</i>	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	2.16
Scope 2	2.20
Scope 3 (Included Sources)	38.97
Total Emissions	43.33

Emissions reduction targets

Reduction Action	Implementation Date	Annual Estimated Savings	Purpose
Upgrade all lighting to LED	December 2026	212kWh	Offices
Energy Awareness Training	April 2027	85kWh	Travel and building use
Upgrade office heating	December 2026	172kWh	Offices
Total		469kWh	

In addition to this, in Scope 1 & 2 we will investigate saving emissions in the following areas:

- Sustainable transport initiatives in the business.
- Increased awareness for staff in transport choices

In Scope 3, we will initiate a project to look at the carbon footprint of our supply chain with a view to working with them to significantly reduce our impact. This is a longer-term goal as Securus is heavily reliant on equipment which is made in Asia and is air-freighted by our supply chain into the United Kingdom. As Securus grows, our usage of these products will increase, so additional vigilance and monitoring will be needed to ensure our footprint associate to this continues to fall.

We predict that by 2032, when we aim for Scope 1 and Scope 2 emissions to be fully Net Zero, that Scope 3 emissions will have fallen by 30%.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

N/A

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Sustainable transport policy
- LED lighting to all offices
- Energy efficient HVAC to all office
- Supply chain review to consider more sustainable supply chain transport

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

.....

Rob Derbyshire, COO
